

AD-4 series

With a protector that prevents the lever from rattling.
Big handle that fits the hand.
Can use by hanging because the intake port is located
on both upper and lower sides.

Air Duster (Standard Nozzle) | AD-4 N

• Standard type.

Air Duster (Long Nozzle) | AD-4 N

• For working in deep and distant places.

Air Duster (Flow Adjustment Nozzle) | AD-4 J

• Can adjust the air flow.

Air Duster (Flexible Nozzle) | AD-4 NF

• Flexible nozzle with a copper tube inside.

Air Duster (High Volume Nozzle) | AD-4 M

• Booster nozzle with a higher spraying pressure.

Cautions

- Make sure of the correct applications and usage before use.
- Do not point to a human body.
- Do not use under more than the maximum working pressure.
- Be careful of the scattered objects and wear protective goggles.
- Do not use when the air is leaked or there are damages on the product.
- Keep in a home the product where children don't reach.

New

Pulse Air Duster

Pulse Air Nozzle 2-pcs. set

No.AD-2 PLS

No.PLS-2P

Powerful blowing even on the uneven surface
with the pulse air blow!

Advantages

- 1 Pulse air : good drainage even from the uneven surface!
- 2 Powerful : Effective air blow!

AD-2 PLS / PLS-2P

point 1

Pulse air in a circular motion.
Good drainage from the uneven place!

Pull the trigger, and the air is discharged in a circular motion from the nozzle tip. Since the rotating air is blown to the workpiece intermittently, dust and water in the gaps on the uneven surface are scraped out smoothly.

point 2

Powerful air blow. Effective blow-off.

Under the same air pressure, the blow is more powerful and the blow-off is more effective.

*Measures air volume that was sprayed to a weighing scale.

point 3

Compact tip.
Easy handling.

The compact size tip and the minimal length enable to handle easily and thus increase operability. Also resin body makes itself light.

point 4

Reduced noises.
Less noise than the tornade type!

The bore of the nozzle tip is $\phi 2.9\text{mm}$, almost same as the normal air duster. Such noises as rubbing ones from a tornade type and the noise due to the higher flow are not caused.

point 5

Can attach the pulse air nozzle to a flexible air hose!

The pulse air nozzle comes with the dedicated adapter. The nozzle can be used as an air nozzle for equipment since it has M10 female thread when the adapter is removed.

Pulse Air Duster

- Pulse blow operation increases the dust removal efficiency.
- Outstanding operability with ergonomically designed handle. Light-weight plastic body.
- Good for blowing chips, particles, water, and oil.

● Working fluid: compressed air ● Pressure resistance: 0.97MPa ● Working temperature range: 0-60°C (32-140°F) ● Air inlet thread dia.: Rc1/4
● Material: Body and Nozzle Polyacetal resin ● Working air hose ID: $\phi 4\text{mm}$ and more ● Air pressure when air consumption is measured: 0.5MPa ● Package: Paper box

Pulse Air Nozzle (2-pc. set)

- Pulse blow operation increases the dust removal efficiency.
- Comes with an adapter to attach a flexible air hose. *Cannot attach this to the AD-2 series.
- Good for blowing chips, particles, water, and oil.

● Working fluid: Compressed air ● Pressure resistance: 0.97MPa ● Working temperature range: 0-60°C (32-140°F) ● Material: Polyacetal resin ● Working air hose ID: $\phi 4\text{mm}$ and more
● Air pressure when air consumption is measured: 0.5MPa ● Package: Plastic bag with header card

AD-2 series

Big lever that can be operated with 4 fingers.
The air flow volume can be adjusted by changing the gripping force.
The handle is ergonomically designed, and it allows outstanding operability.

Air Duster (Standard Nozzle) AD-2 0N

● To blow off machined chips, water, and oil.

AD-2 0N AD-2 0N-PB

Air Duster (Standard Long Nozzle) AD-2 100N

● To blow off machined chips, water, and oil.

AD-2 100N AD-2 100N-PB

Air Duster (Standard Long Nozzle) AD-2 200N/ 300N

● To blow off machined chips, water, and oil.

AD-2 200N AD-2 300N

141114	AD-2 300N	Long Nozzle	300	2.1	135	442	150	1	in paper box 460x138x30	017628

● Working fluid: compressed air ● Max. working pressure: 0.97MPa ● Working temperature range: 0-60°C (32-140°F) ● Air inlet thread diameter: Rc 1/4
● Working air hose I.D.: $\phi 4\text{mm}$ and more ● Air pressure when air consumption is measured: 0.49MPa ● Blister packing (except 200N, 300N that are supplied in a paper box) ※Nozzle can not be replaced.

Air Duster (25°Long Nozzle) AD-2 100A

● 25°angled tip to improve workability.

25°
100

Air Duster (Safety Bypass Nozzle) AD-2 0S

● To blow off safely and quietly in a wide area.

Air Duster (Safety Long Nozzle) AD-2 100S

● To blow off safely and quietly in a wide area.

100

Air Duster (Rubber Nozzle) AD-2 0R

● To blow off dust in the place that should not be scratched.

Soft rubber nozzle

Air Duster (Rubber Long Nozzle) AD-2 100R

● To blow off dust in the place that should not be scratched.

100

Air Duster (High Volume Nozzle) AD-2 0M

● For when more air discharge is required with a low air pressure.

Air flow booster type.
Venturi nozzle emits air to wider area.
2.5 times more discharge volume than AD-2 0N type.

Air Duster (Chip Shield Long Nozzle) AD-2 100P

● Shut out dust rebound.

100
100

Ideal for blowing out dust from a narrow hole or deep place.

Air Duster (Air Screen Nozzle) AD-2 0C

● Shut out dust rebound with air screen.

Air screen shuts out the spreading of oil, water, and cutting dust.
